

PROJECT SUMMARY — Marketing Campaign Performance Analysis

Objective

To evaluate marketing performance across Google, Meta, YouTube, and LinkedIn, and identify the most cost-efficient platforms and high-performing regions for future budget optimization.

Dataset Overview

- Rows: 305
- Columns: 13
- Data Included: impressions, clicks, conversions, spend, revenue, CPC, ROI, engagement metrics, regional performance.

Methodology

- **Data Cleaning:** Removed duplicates, corrected inconsistencies, standardized formats.
- **Processing:** Calculated CPC, ROI, engagement rates; built pivot summaries.
- **Analysis:** Platform ROI comparison, CPC trends, regional conversion performance, engagement benchmarking.
- **Visualization:** Dashboard with KPIs, charts, and region heatmaps.

Key Insights

- **Google — Strongest ROI (785%)**
Lowest CPC (■6.68); highest profitability; best platform for conversions.
- **Meta — Highest Engagement (0.65%)**
Strongest audience interaction; best for awareness and top■funnel goals.
- **LinkedIn — Highest CPC (■22.60)**
High cost with low ROI; only suitable for B2B or premium targeting.
- **YouTube — Weakest ROI (20%)**
Higher CPC; low conversion performance; moderate engagement.
- **Regional: South & East outperform**
South (1241 conversions) and East (1146) show strongest results; West underperforms.

Overall Conclusion

Google provides the highest return on investment, Meta leads engagement, and South/East regions deliver the best conversion performance. Future strategies should increase budgets toward Google, maintain Meta for engagement, and optimize or reduce spending on LinkedIn and YouTube based on campaign goals.
